CLERK.

MR. KEMP SANBY.

MATRON AND HOUSEKEEPER.

MISS MOTSON.

STORE-KEEPER.

MR. TEMPLE.

TO THE

COURT OF QUARTER SESSIONS

FOR THE COUNTY,

AND TO THE

TOWN COUNCIL OF THE BOROUGH OF NOTTINGHAM.

IN compliance with 16 and 17 Vict. c. 97, sec. 62, the Committee of Visitors to the United Lunatic Asylum of the County and Borough of Nottingham, present their Report for the year ending Dec. 31st, 1864 :—

The Asylum is in a fair state of repair.

The ground last purchased will require to be fenced, and some of the old plaster floors to be replaced by boarded floors ; but no great outlay for repairs or alterations is likely to be incurred during the next year.

Twelve of the women admitted during this year were between 60 and 80 years of age, some of whom might have been managed at home by extra care and nursing on the part of their friends.

There are also a few Idiots who might be taken care of elsewhere, if their friends or the parish authorities could be induced to take charge of them.

The Report of the Commissioners of Lunacy dated Nov. 15 1864, sufficiently testifies to the good order of the establishment, and to the care of the Patients under the superintendence of Dr. Stiff.

The number of Patients under confinement, consists of

MALES.	FEMALES.	TOTAL.
161	159	320

The space left unoccupied is sufficient for 59 Patients, viz :—

MALES.	FEMALES.	TOTAL.
46	13	59

The Asylum, therefore, can accommodate 379 Patients, viz :—

MALES.	FEMALES.	TOTAL.
207	172	379

On 31st December 1863 the number of Patients in the house was :—

	MALES.	FEMALES.	TOTAL.
	160	157	317
Admitted in 1864	37	52	89
Discharged in 1864 :			
Recovered	12	23	35
Relieved	3	4	7
Not improved	3	1	4
Died	18	22	40

Compared with the previous year, the changes are as follows:—

	ADMISSIONS.	RECOVERIES.	REMOVED.	DEATHS.	PATIENTS, DEC. 31.
1863	87	36	10	38	317
1864	89	35	11	40	320

J. C. Cane,

CHAIRMAN.

JANUARY 3rd, 1865.

ANNUAL REPORT OF THE SUPERINTENDENT.

MR. CHAIRMAN, MY LORD, AND GENTLEMEN,

In accordance with the twelfth rule, I have the honour to present a report of the general condition of the Patients, and of the state of the Asylum for the year 1864.

The following table exhibits the numerical results of the year:—

				M.	F.	T.
Patients remaining 31st December, 1863				160	157	317
,, admitted during 1864				37	52	89
Total under treatment				197	209	406
				M.	F.	T.
Discharged recovered....				12	23	35
,, relieved				3	4	7
,, not improved				3	1	4
Died				18	22	40
				36	50	86
Remaining 31st December, 1864... ..				161	159	320

The admissions—89, are only two in excess of the previous twelve months, and the total number of inmates on the books remaining is 320 against 317 at the close of 1863. This small addition does not amount to one per cent. on the aggregate, and is probably below the normal rate of increase of the sane population in this county.

The readmissions were 20 ; males 7, females 13. In an institution which has been in full operation for fifty-two years, a greater number of this class may be expected to be received than in the more recently established ones. Patients are occasionally admitted after sane intervals of from twenty to thirty years.

The daily average of insane persons resident in the Asylum was 326.

The recoveries amounted to 35, or 39.32 per cent. on the admissions ; the deaths to 40, or 9.85 per cent. on the total number under treatment, and 12.26 per cent. on the daily average. The death rate fluctuates but slightly from year to year, and the obituary shows that the deaths resulted from causes common to those suffering from diseases of the brain and nervous system. The mean age at death reached 52 years. This favourable return is due to the circumstance that insanity for the most part attacks persons of mature or advanced age.

No fatal accidents have occurred during the year, nor any suicide since 1858. This fact illustrates the advantage of consigning to the Asylum those persons suicidally disposed, as no fewer than 38 persons committed self destruction in the registration county of Nottingham in one year, 1862.

One man escaped and gave considerable trouble before he was re-captured, at the end of ten days.

The number of Patients deemed curable is 42 ; viz : 18 men, and 24 women.

The Commissioners in Lunacy have given in their report, an account of the alterations and improvements effected in the Asylum since their previous visit.

It appears to be necessary to remind parochial officers that the clauses relating to the admission of Lunatics into the County Asylum

should be strictly observed. In the case of ordinary Paupers, that is to say, persons maintained wholly or in part by or chargeable to a Union, the proceeding is to take the alleged Lunatic before a justice or an officiating clergyman, who, after calling to his assistance a medical practitioner, may grant the order of admission. A very different method of procedure must be adopted in the case of persons who are not so chargeable, but who are alleged to be dangerous lunatics, and not under proper care and control. The person deemed to be lunatic must be brought *before two Justices*, by whom the case is to be dealt with, after a preliminary examination of one Justice with the aid, if necessary, of a medical man, and if the two Justices be satisfied, and the physician or surgeon sign a certificate that such person, not being a pauper, is insane, they may direct him to be received into an Asylum. Provision is made to suspend the order if any relation or friend can be found to take proper care of him.

It is to be feared that this salutary clause is occasionally ignored, and that persons not being maintained out of the poor-rate, are sometimes apprehended, brought before an officiating clergyman of the parish, and committed to the Asylum. The inconveniences attending this practice are, that persons, whose circumstances have not been enquired into, are thrown upon the county rate without magisterial authority; that no opportunity is given to the friends to come forward and take charge of them, and that in case of any legal enquiry into the settlement of the individual being made, the original order of admission would be quashed. That due care and judgment must be exercised is shown by the Islington case, where an alleged Lunatic, not legally chargeable, was removed to the Workhouse, under the direction of the relieving officer, against whom an action was brought. The jury found a verdict for the plaintiff, and the damages and costs, on both sides, amounted ultimately to nearly £900. In another case recently tried, £20 damages were obtained against a relieving officer, for causing a person not maintained out of the poor-rate to be placed in a cab and lodged in the Lunatic-ward of the Workhouse. This had been done on the complaint of his family, and on a medical certificate

that he was of unsound mind wholly unfit to be at large, and continually threatening his own life and that of his children. The Judge decided that, although the defendant had simply acted as he believed it to be his duty to do, yet he was legally wrong in not observing the statute. On subsequent litigation the Court of Common Pleas declined to disturb the verdict.

In conclusion I beg to report that the attendants, and nurses, have been generally orderly and attentive in the discharge of their duties.

I have the honour to be,

Mr. Chairman, my Lord, and Gentlemen,

Your most obedient Servant,

Wm. Phillimore Stiff, M.B. Lond.,

SUPERINTENDENT.

COUNTY AND BOROUGH LUNATIC ASYLUM,
SNEINTON, NEAR NOTTINGHAM,
JANUARY 19, 1865.

REPORT OF THE COMMISSIONERS IN LUNACY.

NOTTINGHAM COUNTY AND BOROUGH ASYLUM,

TUESDAY, THE 15TH NOVEMBER, 1864.

SINCE this Asylum was visited on the 5th of March, 1863, there have been 153 admissions, 82 discharges, and 67 deaths: the proportion of males and females being, under the first head, 72 and 81; under the second head, 41 of each sex; and under the third, 29 and 38. The deaths were from natural causes, the principal being general palsy and epilepsy, lung diseases, and exhaustion after mania; nothing in them, excepting one case, calling for remark. This case was a man who was admitted with a self-inflicted wound in the throat, of which he died after a few weeks, when an inquest was held, and a verdict given accordingly. Of those discharged, 64 had recovered.

There are to-day on the books of the Asylum 325 patients, 168 men, and 157 women, all of whom we have seen at our visit; and considering the large number of helpless and otherwise troublesome patients among them, the general condition and personal appearance of the inmates of both divisions were not unsatisfactory. In all the rooms forming the front elevation of the main building, the old windows have been replaced since the last visit by windows of proper construction for the admission of light, and this addition of cheerfulness to the sleeping rooms, as well as day rooms, has contributed greatly to the comfort and improvement of the patients.

The additional accommodation on the male side mentioned in the last entry, remains very much as it then was, the increase of County and Borough patients not having been such as to require their being furnished and put to use, but failing such immediate increase, we think that this vacant accommodation, which is of a superior kind, might with great advantage to the resources of the Asylum be made available for the reception of out-County patients; and we would strongly recommend with this view, that the contemplated similar enlargement on the female side, which will soon be matter of necessity, should at once be proceeded with for reception of an equal number of the other sex; the rate at which such out-County cases are usually taken being nearly double that which is at present charged for those belonging to the Borough or County. There is now vacant space on the male side for 39, and on the female side for 15 additional patients.

Besides the removal of the old windows, some slighter structural changes have also been made since the last visit. At each of the two detached buildings, a lavatory has been turned into a small infirmary of three beds. Improvements have been made in the urinals, water closets, and bath-rooms; the slate baths generally have been replaced by cast-iron baths of better construction; and the clumsy fire grates of the old building have been replaced by more convenient register grates. Circular ventilators have been placed in the ceilings of the upper corridors; and by the building of a new flour store, the old one has been made a sitting room for the female domestic servants. Another change of greater importance, though very limited in extent, has been effected. Boarded floors have been laid down in one day room, one sick room, and two single rooms adjoining; the extension of this latter improvement being the most urgent want and requirement in the old building. Until it can be more fully and satisfactorily supplied, we have suggested that a more liberal amount of matting and carpeting be furnished to the galleries, dormitories, and lavatories.

Further, we have to notice, as evidence of the continued desire to add to the patients' comforts, that some forms in the galleries

have been replaced by Windsor and Derby chairs and settees ; that some of the day rooms and staircases have been painted and papered ; that there has been improvement in the material of some of the clothing in both divisions ; and that there is a better supply of newspapers in the male wards. On the other hand we have to observe in reference to matters remarked upon in former entries, that there is still a great want, on the female side almost universal, of hand rails to the stairs ; that several of the dormitories are still deficient in blinds ; that much more painting and papering will have to be done ; that the large unsightly fire-guards are still here ; and that the arrangements for giving patients out of both divisions, but especially the women, opportunities of occasional exercise beyond the Asylum, are still insufficient.

In connection with this latter subject, it seems to us that as the proximity of the Asylum to the town is felt to be the difficulty, experiment should be made of rendering available for the purpose desired such land as belongs to the Asylum itself. The kitchen garden, with some farm ground, occupies about twelve acres ; and we recommend that walks should be formed around it in various directions, that it should be planted with trees, and opened to the use of the patients for regular exercise from time to time. We suggest also that the very cheerful main airing court, now used by both sexes, would be greatly enlarged in effect by substitution of a light fence or paling for the wall now dividing it from the women's airing court.

To-day being the patients' visiting day, we saw them with their friends, of whom there was a considerable attendance in the laundry, there being no other room available for the purpose ; and as the want of a recreation room seems also to be much felt, we think that a room should be constructed that might be used in both ways. We have to add in connection with the laundry, that it would be highly desirable to increase the steam power now in use so as to apply it to the working of the wringing and washing machines.

The numbers employed in the laundry are about 26, in household work 20, and in needle work 30 ; those regularly so employed

on the female side being 76 : while of the men, 20 work in the garden and grounds, 14 in the kitchen and workshops, and 47 in the galleries, the entire number so engaged being 81. As to amusements also, the usual report is to be made, the arrangements with that view being various and apparently ample ; and the number taking part in them being 125 men and 100 women. The Sunday attendances at chapel comprise about 83 of each sex.

There has been no restraint since the last visit, and the instances of seclusion, which have never been for any long periods, have been confined to 28 patients, of whom 19 were women. The night watch is very efficient, and the number of wet and dirty cases altogether inconsiderable. The patients registered as under treatment are few ; but besides those in bed for bodily illness, several appeared to be there for no better cause than that of troublesome habits, and we very earnestly recommend that in No. 1 wards, on both sides, trial should be made of an extra nurse and an extra attendant.

Our visit has given us upon the whole a very favourable impression of the state of this Asylum, and of the energy and ability of the medical superintendent, the increasing value of whose services, we are glad to find, has been lately very judiciously recognised by the Committee of Visitors.

John Forster, }
James Wilkes, } COMMISSIONERS IN LUNACY.

APPENDIX.
